

WHAT IS NEW WITH PROGRAM REVIEW?

This document provides a bullet-pointed list of changes you can expect in the Program Review Submission Tool (PRST) and in Program/Unit Review 2016-17 planning for 2017-2018.

PROGRAM REVIEW SUBMISSION TOOL CHANGES

- Please be sure to review and make any updates to your program/unit's list of Unit Members (located under the Unit Profile tab). As you will only be able to enter in New Objectives and edit Past Objectives for the program(s)/unit(s) in which are listed a member of.
- In about two (2) weeks Student Retention and Support Services Program (3SP) will be added to the list of programs under Student Services.
- In the Past Objectives interface "Ongoing" has been added to the list of Status options.
- If you do not update the status and edit your Past Objectives before moving to New Objectives, a pop-up window will appear prompting the user "Copy last year's objective records over to this year...(Objectives with the status Abandoned or Completed will not be copied) Proceed with copy" – Yes or No". By clicking the "Yes" button all of past year's objectives (with the exception of Abandoned or Completed) will be copied over to "New Objectives". By clicking "No" you will be taken back to the "New Objectives" interface.
- Law Enforcement Academy and Administration of Justice have been separated in the 'List of Programs'.
- Emergency Medical Services and Fire Technology have been separated in the 'List of Programs'.
- If a Past Objective is "copied" over to a New Objective and the user deletes from the New Objective interface; the past objective is only deleted from the New Objective interface (i.e. the Past Objective will still appear under the Past Objective interface).
- In the next cycle look forward to these changes:
 - Expansion of the number of programs to enter for "Activities Collaboration" in the New Objectives interface
 - Allow activities that are linked to objectives to be entered individually in the New Objectives interface so these activities can be reported on individually the following year under the Past Objectives interface.
