## Campus Alert System

In our county there are a variety of alert methods used to keep the public informed about emergencies or potential emergency situations. We have developed this page to provide you with access to these systems and we encourage you to take full advantage of them.

To view current information about alerts or developing situations that may adversely affect our campuses or facilities, please visit the [Alert Bulletins](#) page.

When an alert has been issued or an emergency is in progress, we will make every effort to update the Alert Bulletins page and provide you with the most current information available. We recommend that you save this page in your "Favorites" folder or on your browser desktop to provide quick access during an emergency.

## **Contra Costa Community College District Campus Alert System (4CD Alert)**

The Contra Costa Community College District Campus Alert System (4CD Alert) uses a variety of methods to alert the community and emergency responders whenever a significant life-threatening hazard occurs. The system utilizes outdoor sirens located at the following campuses:

- Contra Costa College
- Diablo Valley College
- Los Medanos College
- San Ramon Campus

The system will also alert subscribers who register to receive e-mail and/or cell phone text messages.

To subscribe to receive alerts via e-mail and/or cell phone text message, please visit our [4CD Alert Subscription Page](#).

### **If you hear the alert siren or receive an alert notification:**

- **Shelter** (go to a safe indoor location)
- **Shut** (close and lock all doors and windows)
- **Listen** (tune to KCBS 740 AM or 106.9 FM, KTVU -2 or access the District web page at [www.4cd.edu](http://www.4cd.edu) for further information or instructions)

Sirens are tested on the first Wednesday of every month at approximately 11:00 a.m. During testing, the sirens sound for approximately 30 seconds. If the sirens are heard at any other time or the sound

continues for longer than one minute, take immediate protective action.

For more information about 4CD Alert, please visit our [4CD Alert FAQ Page](#).

### **U.S. Homeland Security Advisory System**

The U.S. Homeland Security Advisory System uses color-coded threat levels to communicate with public safety officials and the public. The system identifies the threat level for a region (or regions) and the protective measures that may be implemented to reduce the likelihood or impact of an attack.

To view the current threat level or learn more about this system, please visit the [United States Department of Homeland Security website](#).

### **For More Information**

#### LMC student robbed on trail behind LMC (March 5, 2014)

On Wednesday afternoon, March 5, an incident happened just off the LMC property. An LMC student was robbed by five individuals on the trail that runs behind the back or south side of LMC.

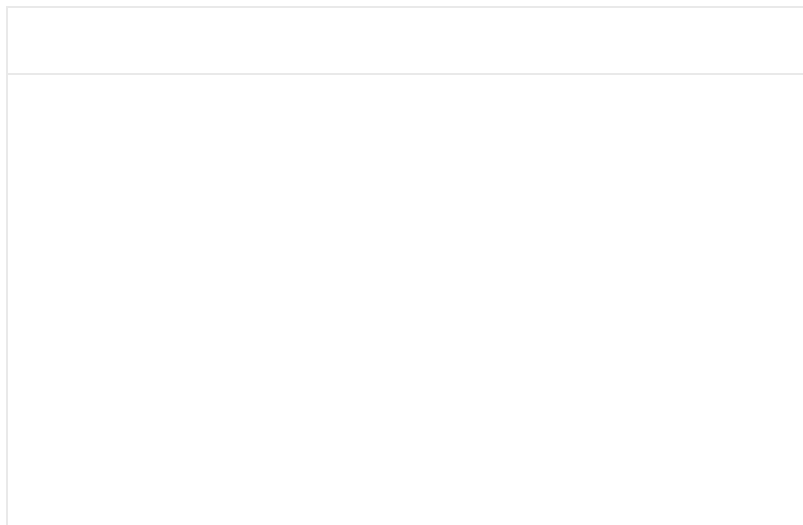

East Bay Regional Parks Police responded to the area and spoke with the student and has documented the incident. We wanted to make you all aware of this incident, as we know many people use this trail to access the College property.

Your safety and the safety of all of our students and employees is the highest of priorities for the College. Please be aware of your surroundings when walking on the trail and if you see anything suspicious, please contact Police Services at (925) 439-1505, or 911 if it is an emergency.
