WE CONTINUE BUILDING FOR SUCCESS AT LMC!

The east side of the College Complex is now closed due to construction.

Access is limited to and from the outside quad. Please follow directional signs and maps to gain access and/or exit the College Complex.

December 2012 TO Spring 2015

FROM TO

WE ARE RENOVATING TO ACCOMMODATE A CENTRALIZED STUDENT SERVICES CENTER

The Student Services construction project involves gutting the east side of the College Complex and renovating two floors resulting in a centralization of all of LMC’s Student Services offices in one place. Construction began at the conclusion of Fall 2012 and be completed in 2015.

Because the construction affects access across campus, students are encouraged to take it into consideration when planning classes and also when parking. It may take 10 or more minutes longer because of the construction.

During Spring 2013, access into and out of the east side of the College Complex is very limited. There is a narrow walkway from the outdoor quad along the side of the Complex, downstairs and into the building by the Planetarium on the 2nd level. Disabled students will be able to access the elevator next to the large outdoor staircase, traverse the walkway, and enter the building through the Nursing Department.

Other construction closures include closing the walkway that runs from Lot B, along the west side of the Math Building, and into the College Complex. A portion of Lot B (closest to the Math Building, not covered by solar panels) is also closed as a staging area for the construction crew. The southeast entrance into the College Complex (by the restrooms) is closed, however the restrooms remain open. The 2nd floor of the College Complex will be somewhat affected as the eastside classes normally used for business classes are closed during the construction.

We ask for everyone’s patience during this time of renewal for the college. It was only by dealing with construction that the college was able to build the new Science and Math buildings and the Library, and everyone is certainly glad we have those buildings to support student success. Having all of the Student Services functions in one place will make everything run smoother and easily accessible for all of us!

This project is supported by Bond Measure A+, voted on in 2006 and paid for by the residents of Contra Costa County. This bond measure also supported completed projects including renovating the athletic field, the new nursing and emergency medical training classrooms and labs, expanding Lot B, setting up the swing space for offices displaced by the Student Services renovation, and purchasing 17.5 acres where the new Brentwood Center will be built.

Thank you for your cooperation and patience!
