

OPTION 2

OPTION

New Project Group A		New Project Group C	
1	Child Study Center	8	PAC/Music
2	Health & Public Services, Loop Road	9	Gym
3	CTE/Interdisciplinary Labs, Art	10	Housing
4	M&O, Business Services		

English
Social Science
Art
Drama → new building

child studies → welcome center
Basic needs
swivel pathway

Group C include: Library and gym renovations include KAC, Union

please include environmental impact of renovation vs. new building + tear down

Separating the new building from the old building

ARBORETUM

Keep Little Theatre Building

A planetarium is a unique facility that touches people in a way that can't be equalled by any "interdisciplinary space." Pop-up planetariums are useful for temporary applications, only (I have one in my garage, it is not in any way a replacement).

Our planetarium star projector is a half million dollar piece of equipment that has been very well maintained for 20 years and has decades of life left in it. The theater itself has needs (seating, carpeting, lighting), but nothing impossible.

Maker space should have close access to parking/bus for public use

with plenty of tools to work for STEM (various building programs)

Why a whole building for business services (AND maintenance)

I Really Liked Bringing classes towards Leland a moving parking to the back of the college. Leaving the parking where it is on Leland does not improve our image

OR change the perception. This also gives SS (F) the front (near parking) with better signage.

Return front-end parking for use of PAC + Welcome Ctr (guests)

traffic control for P&T events is problematic w/ this entry
