

# MESA UNPLUGGED SERIES

PRESENTS

AN INTIMATE CHAT WITH...

## Eric Dutra

Electro-Optics Engineer

**FRIDAY, FEB. 22, 2013**

**1:00 PM**

**MESA Center**

Eric Dutra graduated from Pittsburg High school in 1999 and worked in the construction field until he felt it was time for a change in his life. In 2007, he decided to quit his full time job to enroll in school at LMC and study Physics instead. In August of 2009, he transferred to UC Berkeley to continue his Physics studies. During the summer of 2010, Eric had an internship at National Security Technologies (NSTec), where he worked with the Advance Sensor Development department. During his senior year at UC Berkeley, he acquired an internship at Lawrence Berkeley National Laboratory. It was there that he worked with the Weak Interactions Group setting up an Ion Beam Trap at the cyclotron. Eric graduated from UC Berkeley during the summer of 2011, and was asked to come back to NSTec, to work for the Electro-Optics Engineering Group in R&D. He has been there ever since.

**Please join MESA as Electro-Optics Engineer, Eric Dutra, shares his personal and inspiring journey with us.... Unplugged!**

**See you there!**

**LOS MEDANOS  
COLLEGE**
