

Los Medanos College

Reviewing progress toward Interim Plan Goals

District Office of Research & Planning March, 2015

LMC's Strategic Priorities

Strategic Priority #1 - Increase and Accelerate Student Program Completion

Strategic Priority #2 - Build Stronger Relationships Among Faculty, Staff and Students to Increase Engagement and Student Success

Strategic Priority #3 - Increase and Accelerate Student Completion of Basic Skills Sequences

Strategic Priority #4 - Improve the Academic Success of our African American Students

Review of data related to LMC's interim Strategic Plan

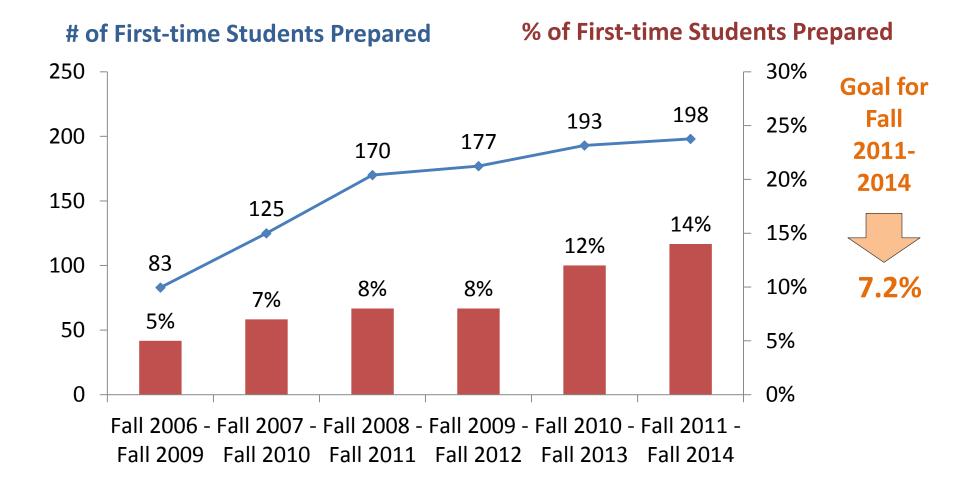

STRATEGIC PRIORITY #1 – Increase and Accelerate Student Program Completion

C. SUPPORTING OBJECTIVES

- By Fall 2014, there will be a 3% increase in the number of students who become "transfer prepared" within 3 years of enrollment compared to a Fall 2007 Fall 2010 baseline of 4.2%. This means that <u>7.2% of all new students in Fall 2011 will be 'transfer prepared' by Fall 2014</u>.
- ii. In academic year 2013-2014, there will be a minimum of <u>362 transfers to UC/CSU</u>, a 3% annualized increase over the 2008-2009 baseline of 315 students.
- iii. In academic year, 2013-2014, there will be a minimum of **708 AA/AS degrees will be awarded**, a 10% annualized increase over the 2008-2009 baseline of 464 AA/AS degrees.
- iv. In academic year 2013-2014, a minimum of <u>130 state approved certificates</u> will be awarded; a 20% annualized increase over the 2008-2009 baseline of 65 state approved certificates awarded.
- v. In academic year 2013-2014, a minimum of <u>462 locally approved certificates</u> will be awarded, a 10% annualized increase over the 2008-2009 baseline of 308 locally approved certificates awarded.

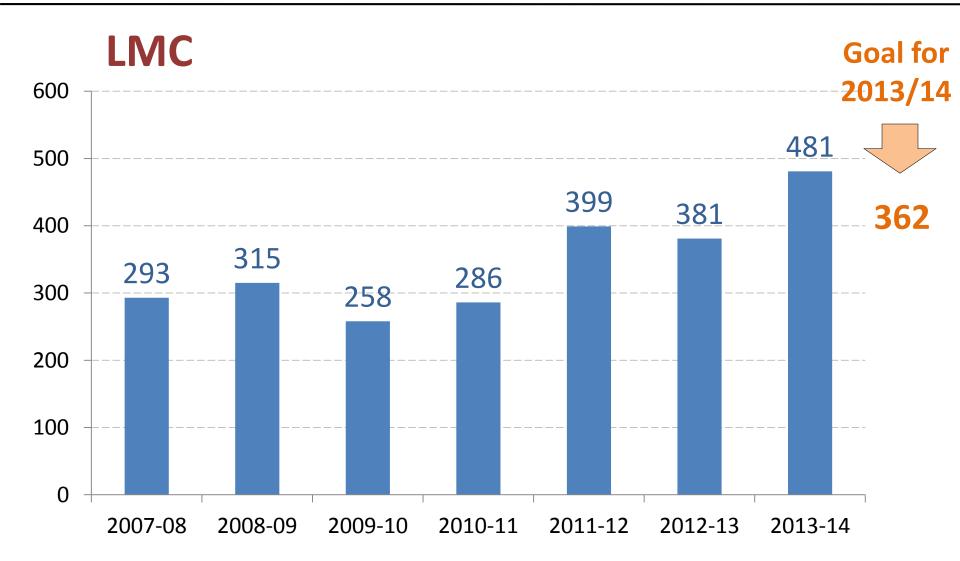

Transfer Prepared within Three Years

- Transfer Prepared = Students who completed 60 transferable units and a cumulative GPA of 2.0 or above.
- Data Source: Colleague

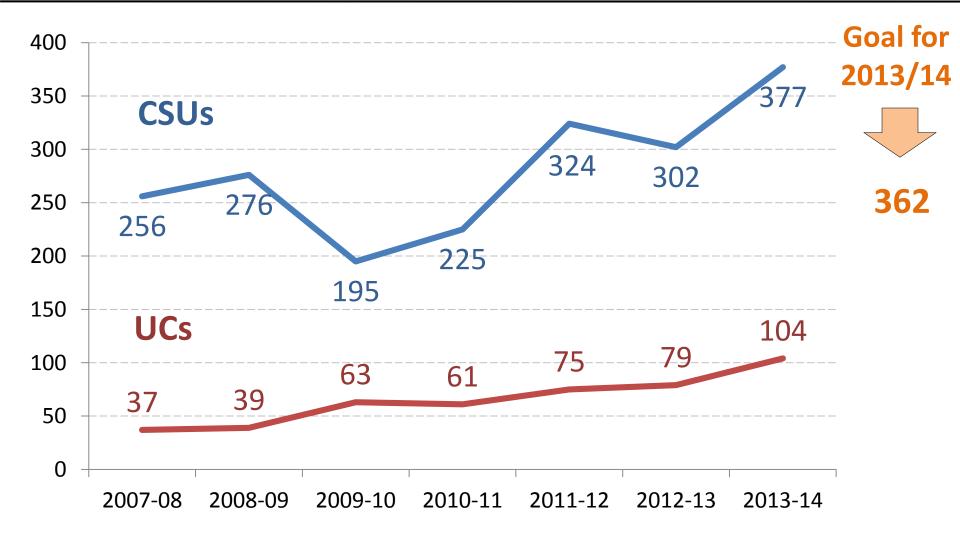

Transfers to UCs & CSUs

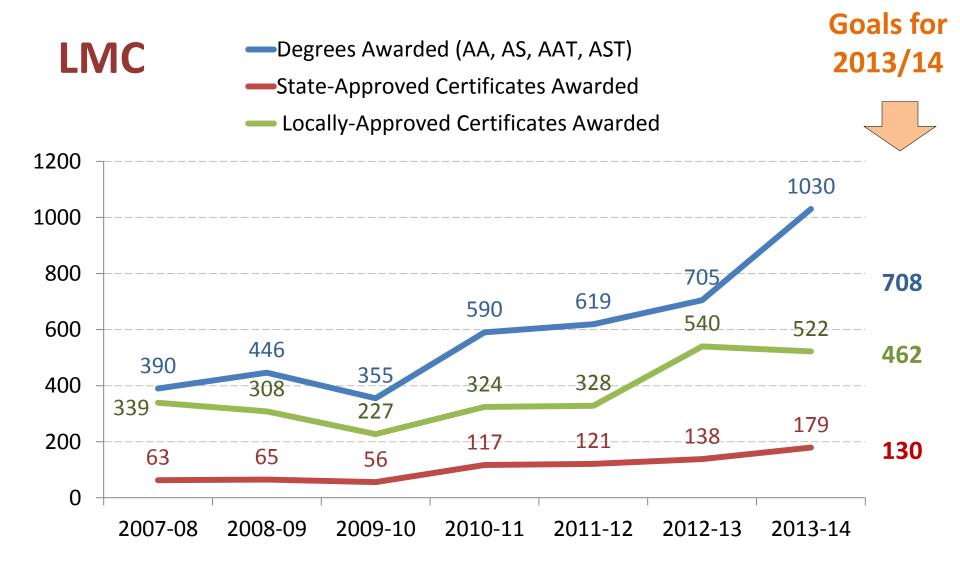

Student Transfers to UCs and CSUs

Degree and Certificate Production

STRATEGIC PRIORITY #2– Increase and Accelerate Student Completion of Basic Skills Sequences

C. SUPPORTING OBJECTIVES

i. By Spring 2013, create specific objectives regarding engagement using the results of the SENSE, CCSSE, CCFSSE, and other locally developed instruments (conducted in academic year 2012 - 2013) that measure the engagement of students and employees.

Los medanos College

Review of data related to LMC's interim Strategic Plan

CCSSE Summary Report

CCSSE

Key Findings: A Starting Point

The Key Findings report provides an entry point for reviewing results from your administration of the 2013 Community College Survey of Student Engagement (CCSSE). The report provides college-specific data in an easy-to-share format including benchmark comparisons between the college, top-performing colleges, and the CCSSE cohort. It also highlights aspects of highest and lowest student engagement at the college, as well as results from five of the CCSSE special-focus items on promising educational practices. Select faculty survey data are also highlighted.

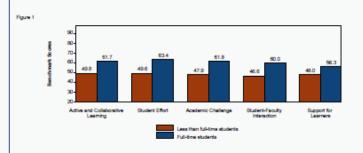

Promising Practices for Student Success

In each annual administration, CCSSE has included special-focus items to allow participating colleges and national researchers to delve more deeply into areas of student experience and institutional performance of great interest to the field. The 2013 special-focus items are part of an ongoing national research project focused on community college students' participation in a defined collection of promising practices for which there is emerging evidence of effectiveness in strengthening student learning, persistence, and attainment. This work will link data from the CCSSE special-focus items; related items of the faculty survey (CCFSSE), which explore the evtent of faculty members' use of the identified promising practices in their treaching; and institutional data collected from the Community College Institutional Survey (CCIS) that address questions about how these promising practices are implemented across varied institutions.

This data collection will provide empirical confirmation of promising educational practices in community colleges, quantification of the extent to which those practices are part of the current experience of our students, and information about whether participation in these types of practices varies across subgroups of students. Ongoing data analysis will provide new evidence of how student participation in these practices is related to overall student engagement, academic progress, and college completion.

Benchmark Overview by Enrollment Status

Figure 1 below represents your institution's CCSSE benchmark scores by students' enrollment status.

SENSE Summary Report

SENSE

Benchmarks of Effective Educational Practice With Entering Students

SENSE Benchmarks

* Early Connections

When students describe their early college experiences, they typically reflect on occasions when they felt discouraged or thought about dropping out. Their reasons for persisting almost always include one common element: a strong, early connection to someone at the college.

* High Expectations and Aspirations

Nearly all students arrive at their community colleges intending to succeed and believing that they have the motivation to do so. When entering students perceive clear, high expectations from college staff and faculty, they are more likely to understand what it takes to be successful and adopt behaviors that lead to achievement. Students them often rise to meet expectations, making it more likely that they will attain their goals. Othen, students' aspirations also climb, and they seek more advanced credentials than they originally envisioned.

* Clear Academic Plan and Pathway

When a student, with knowledgeable assistance, creates a road map—one that shows where he or she is headed, what academic path to follow, and how long it will take to reach the end goal—that students are more likely to persist if they not only are advised about what courses to take, but also are helped to set academic oasis and to create a plan for achieving them.

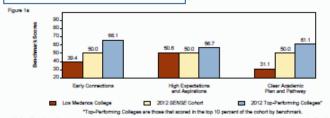

Continued on Page 3

The Survey of Entering Student Engagement (SENSE) benchmarks are groups of conceptually related survey items that address key areas of entering student engagement. The six benchmarks denote areas that educational research has shown to be important to entering students' college experiences and educational outcomes, thus, they provide colleges with a useful starting point for looking at institutional results.

Ideally, colleges engage entering students in all six benchmark areas, beginning with a student's first completion of the first three weeks of the initial academic term. This time is decisive because current research indicates that helping students succeed through the first academic term can dramatically improve subsequent success, including completing courses and earning certificates and degrees.

While many student behaviors and institutional practices measured by the benchmarks can and should continue throughout students' college careers, the SENSE items and the resulting data focus on this critical entering student timeframe.

SENSE benchmark scores are computed by averaging the scores on survey items composing the benchmarks. Benchmark scores are standardized to have a mean of 50 and standard deviation of 25 across all respondents.

Notes: Benchmark scores are standardized to have a mean of 50 and a standard deviation of 25 across all respondents. For further information about how benchmarks are computed, please visit www.cocse.org.

Review of data related to LMC's interim Strategic Plan

<u>STRATEGIC PRIORITY #3</u>– Increase and Accelerate Student Completion of Basic Skills Sequences

C. SUPPORTING OBJECTIVES

iii.

- Increase the percentage of basic skills math students who successfully complete the DE math program within 3 years by 3% and those who complete a transfer level math course in this same time period by 5% over the Fall 2008 – Summer 2011 baselines of 35.5% and 19.5% respectively.
- ii. Increase the percentage of basic skills English students who successfully complete the DE English program within 3 years by 2% and those who complete a transfer level English course in this same time period by 4% over the Fall 2008 – Summer 2011 baselines of 59.2% and 38.2% respectively.

Changes to the California Chancellor's Office treatment of basic skills coding schemes (CB21) in 2009 make it very difficult to track basic skills sequence improvement rates prior to that date. So at this point we can reliably track sequence rates for students enrolling as of Fall 2009

Basic Skill Math 3-Year Sequence Completion Data

	Fall 2010 Cohort - End Fall 2012		Fall 2011 Cohort - End Fall 2013			Fall 2012 Cohort - End Fall 2014

Review of data related to LMC's interim Strategic Plan

STRATEGIC PRIORITY #4 – Improve the Academic Success of our African American Students

C. SUPPORTING OBJECTIVES

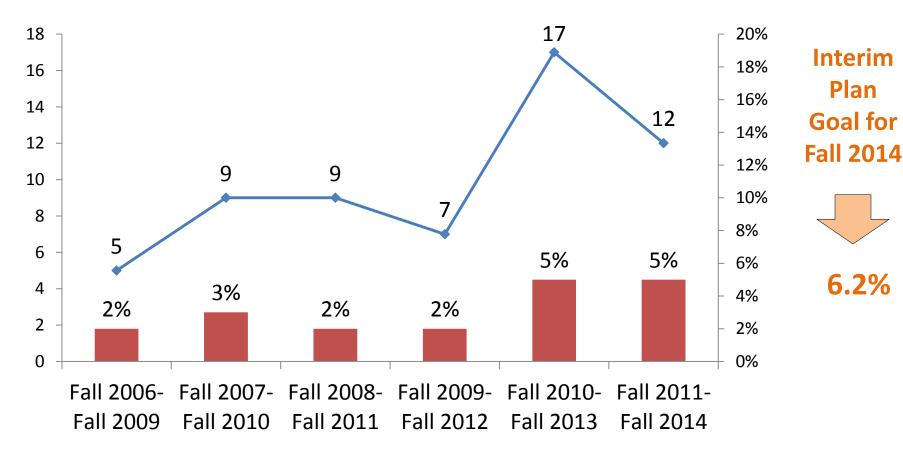

- By Fall 2014, there will be a 5% increase in the number of African American students who become 'transfer prepared' within 3 years of enrollment compared to a Fall 2007 – Fall 2010 baseline of 1.2%. This means that 6.2% of all new African American students in Fall 2011 will be 'transfer prepared' by Fall 2014.
- ii. Increase the percentage of African American basic skills math students who successfully complete the DE math program within 3 years by 7% and those who complete a transfer level math course in this same time period by 10% over the Fall 2008 – Summer 2011 baselines of 21.6% and 9.1% respectively.
- iii. Increase the percentage of basic skills English students who successfully complete the DE English program within 3 years by 6% and those who complete a transfer level English course in this same time period by 10% over the Fall 2008 – Summer 2011 baselines of 40.2% and 21.9% respectively.
