9/29 Division Meetings Report Outs & Discussion <ul style="list-style-type: none">Brentwood, Liberal Arts, Math & SciencesGroup Discussion	45 min	Brentwood (Moots): Liberal Arts & Sciences (Rachel Anicetti): Key takeaway: Question: If blocks are built for the afternoon, would students actually enroll and is an evening block necessary? What about room utilization? There could be a higher demand for the afternoon classes, but we won't know unless we know. Math & Sciences (Nicole): Not a lot of emphasis on Cal-GETC courses. Takeaways: Consider shortening Monday meeting time or move If more evening or Saturday classes are offered, consideration must be given to the availability of support staff/departments. Consideration should also be given to modality. There are some departments that are predominately online (ECE, business, and drama, for example). DSPS students in particular prefer face-to-face classes. Clarification of the charge for this group: Are we analyzing the schedule or actually recommending/make a change. How do you evaluate block scheduling.
Next Steps	10 min	Input/suggestions should be shared with Ryan and A'kilah.
