

Letter of Interest: Curriculum Committee

To: Academic Senate and Curriculum Committee

My name is Randi Osburn, this is my second year as a full time faculty member in the Child Development department at LMC. I am writing this letter to express my interest in joining Curriculum Committee as a Health and Behavioral Sciences rep. I come to LMC with six years of experience as an adjunct instructor across three campuses and a background in Early Intervention, working for and in partnership with the Regional Center and school districts to provide and advocate for individualized services for children with special needs and their families.

I am interested in joining Curriculum Committee as I have some experience with eLumen from other campuses and have participated in COOR revisions, program review and assessments in eLumen and I enjoy the work. I also have a lot to learn about LMC and the inner workings, I was hired at the start of COVID and have not been on campus as much, I hope that joining Curriculum Committee would help me grow and become more connected to LMC.

Thank you for your consideration.

Sincerely,

Randi Osburn
