

Brentwood Campus
College Assembly Monday, February 10, 2020
Activity...

1. Who are our students?

Decrease in white students, significantly serving no white students.

Data does not include/distinguish Brentwood. There is a mix with distance ed students.

Do we offer more online sections? Math yes, what about the other courses.

Data needs to be cleaned-up, coding is an issue.

More students of color and continuing students.

Need more data specific to Brentwood students.

What is the demand? Anecdotal data.

Additional comments:

Block scheduling...STEM concern regarding block scheduling...Majors Bio

Student needs is valuable when addressing... the needs of specific student profiles...

what are we going to "focus" on and how do we maintain a level of flexibility....

2. Profile of students at Brentwood...set schedule...currently looking at schedule...Math
Chem, Phys...Not everyone is at the same starting point...Staffing...is there enough? How
do we align with Support Services? Boot Camp...

Additional Pittsburg Campus constraints include lack of sufficient lab supports.

We need to be more prescriptive with our student schedules.

3. Current delivery options- rollover of schedules. Looking at student educational plans to
assist in planning for number of sections offered. Sharing spaces, proctoring.

LMC does NOT offer degree or certificate programs which would prepare students for
entry into 11 of the fastest growing occupations in the country.
