

Results Report - Instructions & Compliance

INSTRUCTIONS

Throughout the results tables in this report, the following symbols may appear:

- * The category “Student of Color” includes all groups except the group “Caucasian or White.”
- ^ Means are not computed for cell sizes equal to 0.
- ^ Standard deviations are not computed for cell sizes less than or equal to 1.

COMPLIANCE & RISK OF DISCLOSURE

Due to small racial group sizes, please exercise caution when deciding to publish this report to the public.

Organizations disclosing the data in the form of public aggregate reports are responsible for minimizing any such risk while still meeting the disclosure requirements and providing as much useful and transparent information to the public as possible. Before releasing student data, an organization must determine the acceptable level of risk of disclosure. In each specific case, the entity disclosing the data should evaluate the risk of personally identifiable information (PII) disclosure within the context that the data will be used.

The FERPA standard for de-identification assesses whether a “reasonable person in the school community who does not have personal knowledge of the relevant circumstances” could identify individual students based on reasonably available information, including other public information released by an agency, such as a report presenting detailed data in tables with small size cells (34 CFR §99.3 and §99.31(b)(1)).

Reporting frequency counts for small racial groups does not by itself constitute a disclosure of personally identifiable information (PII); however, the smaller the cell size, the greater the likelihood that someone might be able to identify an individual within that cell, and thus the greater the risk of disclosure.

Many statisticians consider a cell size of 3 to be the absolute minimum needed to prevent disclosure, though larger minimums (e.g., 5 or 10) may be used to further mitigate disclosure risk. Minimum cell sizes adopted by individual States range from 5 to 30 students, with a majority of States using 10 as their minimum (NCES 2011-603).
